Dear Hiring Manager,

I am showing my interest to join your company aroggo limited as an API developer. I learned API testing and documentation using Postman and Rest Assured. Now, I want to gain real world experience in the backend. I am now eager to transition into designing and developing the core backend systems that power your platform.

My goal is to build scalable, secure, and resilient APIs that handle high-volume traffic with ease. I am confident that my technical mindset and dedication to clean, developer-friendly architecture will allow me to contribute effectively to your backend team while gaining valuable real-world experience.

Thank you for your time and consideration. I look forward to the possibility of discussing how my skills align with Aroggo's technical needs.

Sincerely,

Md Jahangir Alam
